ABSTRACTED-PUB-NO: JP 11199739A

BASIC-ABSTRACT: NOVELTY - Composite comprises: (A) ternary  
polymerised fluoro  
rubber type thermoplastic elastomer; and (B) a blend of  
35-75 mol. %  
tetrafluoroethylene, 10-35 mol.% vinylidene fluoride and  
10-30 mol. %  
hexafluoro propylene.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also  
included for the moulded  
product obtained by heat forming, followed by irradiating  
with ionising  
radiation of at least 1 Mrad. The compact mass is then  
shaped as a tube.

USE - Used in gasket, tube and packaging.

ADVANTAGE - The composite has improved tackiness without affecting its transparency. Fluoro rubber resin has good heat, oil and chemical resistant property.

ABSTRACTED-PUB-NO: JP 09176425A

BASIC-ABSTRACT: A fluorine-containing resin composition  
comprises 100 pts. wt.  
of a composition consisting of a fluorine-containing  
thermoplastic copolymer  
with a composition ratio of vinylidene fluoride,  
hexafluoropropylene and  
tetrafluoroethylene falling within the range surrounded by  
4 points of  
10:35:55, 10:15:75, 55:5:40 and 55:15:30 and a fluorine  
rubber copolymer at a  
wt. ratio of 98:2-40:60 with upto 40 pts. wt. of a  
crystalline fluorine resin

and/or a vinylidene fluoride-fluoroolefin copolymer.

USE - Used for electric wire-covering materials,  
electroinsulation tubes and  
heat-shrunk tubes.

ADVANTAGE - The composition does not cause heat softening  
phenomenon in use at  
a high temperature around 180 deg. C, has excellent  
flexibility, mechanical  
strength and mechanical elongation, low hardness and  
excellent heat set  
properties and can mix to provide light colour  
compositions.
